FRONT-END DEVELOPMENT ROADMAP

Team Cipher

WHAT IS THE WEB?

The web is a network of connected pages and applications that you open in a browser. Everything you see online is built with code.

Website

A collection of pages (company site, blog, portfolio...).

Web Application

Interactive system (Gmail, Facebook, online store...).

Browser

The program that reads the code and shows it to the user.

Front-End

The part that runs inside the browser and the user sees.

UI vs UX

Two different things that work together to make a great product

UI • User Interface

How it looks

- ▶ Buttons, colors, fonts, icons
- ▶ Layout and visual design
 - ▶ Spacing and alignment
- ▶ What the user sees on screen
 - ▶ Focus: beauty & clarity

UX • User Experience

How it feels

- ▶ Is it easy to use?
- ▶ Does the flow make sense?
- ▶ Is the user happy / frustrated?
- ▶ The whole journey of the user
 - ▶ Focus: ease & satisfaction

FRONT-END vs BACK-END

FRONT-END

What the user sees & interacts with

- ▶ HTML + CSS + JavaScript
- ▶ Buttons, menus, forms, pages
- ▶ Responsive design
- ▶ Animations & interactions
- ▶ React / Vue / Angular later

BACK-END

What happens behind the scenes

- ▶ Servers & databases
- ▶ User accounts & login
- ▶ APIs & data storage
- ▶ Security & business logic
- ▶ Node / PHP / Python...

WHAT IS A WEBSITE MADE OF?

Every website is built from three main layers:

HTML

Structure

The skeleton.
Headings, paragraphs,
buttons, images, forms.

CSS

Style

The design.
Colors, layout, fonts,
animations, responsive.

JavaScript

Behavior

The brain.
Clicks, data, APIs,
interactive features.

WHAT ARE REACT, VUE & ANGULAR?

JavaScript libraries/frameworks used to build modern interactive websites faster.

React

By Meta (Facebook)

- Most popular today
- Component-based
- Huge job market
- Recommended to learn

Vue

By Evan You

- Easiest to learn
- Very flexible
- Great documentation
- Good alternative

Angular

By Google

- Full framework
- More complex
- Used in big companies
- Steeper learning curve

IMPORTANT NOTE

You do NOT start with React / Vue / Angular

These tools are built on top of JavaScript.

If you skip HTML, CSS and pure JavaScript, you will struggle later.

1. First: Master HTML + CSS + JavaScript
2. Then: Choose one framework (we recommend React)
3. Learning the fundamentals makes frameworks easy
4. Most companies expect you to know the basics first

WHAT IS THIS TRACK?

A complete learning path from zero to building real websites.

Track / Roadmap

An ordered list of skills you learn one after another so you never feel lost.

Why this order?

You must understand the foundation (HTML + CSS) before adding logic (JS) and libraries.

Goal of the track

Build real projects, publish them on GitHub, and be ready for freelance or junior jobs.

How long?

Full-time: 5–8 months | Part-time: 9–14 months (depending on consistency).

THE PATH (IN ORDER)

Golden Rules

- Never skip the order
- Do every Elzero assignment — this is the real training
- Choose the instructor you understand more (Elzero or Gamal)

BEFORE YOU START

Mindset

- ▶ Code a little every day
- ▶ Build more than you watch
- ▶ Bugs are your teachers
- ▶ English helps a lot
- ▶ Ask questions freely
- ▶ Fundamentals first
- ▶ Finish what you start

Tools

VS Code

Your main editor

Chrome DevTools

Debug & inspect

Git + GitHub

Save & share code

Node.js + npm

Install packages

Terminal

Basic commands

Notes app

Track progress

01 • HTML

The skeleton of every page • ~3 focused days with assignments

Elzero Web School

Learn HTML In Arabic 2021

`youtube.com/playlist?list=PLDoPjvoNmBAw_t_XWUFbBX-c9MafPk9ji`

Assignments:

`elzero.org/study/html-2021-study-plan/`

Abdelrahman Gamal

كامل بالعربي HTML كورس

`youtube.com/playlist?list=PLknwEmKsW80tLRQPTLms79499meY2D6ij`

Pick the style you understand better.
Both are excellent.

How the assignments work

HTML is split into ~3 weeks. Each week has videos + assignments.

Watch the week's videos → solve the assignments immediately.

With focus, HTML + all tasks ≈ 3 days.

02 • CSS

Give the skeleton its look • Master Flexbox & Grid

Elzero Web School

Learn CSS In Arabic 2021

youtube.com/playlist?list=PLDoPjvoNmBAzjsz06gkzLSrlev53MGIKe

Assignments:

elzero.org/study/css-2021-study-plan/

Abdelrahman Gamal

كامل بالعربي CSS كورس

youtube.com/playlist?list=PLknwEmKsW80s7rKViMCL8x6irVJT7McSS

Same idea: watch → practice → assignments.

After HTML + CSS → Do the 4 Practical Projects

elzero.org/practical-html-css/

These 4 projects lock everything you learned. Do them before frameworks.

03 • CSS FRAMEWORKS

After the 4 projects • Choose one (or learn both)

Bootstrap 5

Elzero – Bondi Design

`youtube.com/playlist?list=PLDoPjvoNmBAyvm7f--dc6XqkpfDcen_vQ`

Rebuild one of your pure CSS projects using Bootstrap.

Tailwind CSS

Modern & highly demanded

`youtube.com/playlist?list=PLxbVBWjVdAEjmn2KbE1886vVkPv1Iu67J`

Very popular in current jobs.
Practice by rebuilding a project.

JS 04 • JAVASCRIPT

The brain of the page • Elzero Bootcamp ≈ 22 weeks of solid practice

Elzero Web School

Learn JavaScript in Arabic 2021
(188 videos – full bootcamp)

youtube.com/playlist?list=PLDoPjvoNmBAx3kiplQR_oeDqLDBUDYwVv

Study Plan + Tasks:
elzero.org/study/javascript-bootcamp-2021-study-plan/

Abdelrahman Gamal

كورس جافا سكريبت كامل

youtube.com/playlist?list=PLknwEmKsw80uTqUDaFRBiAViDZ5uI3VcE

Strong practical style +
many projects.

Tip

Do every weekly assignment. After the course, build small apps (To-Do, Weather, Quiz, Product CRUD) to lock the knowledge.

05 • AFTER JAVASCRIPT

Git & GitHub

Save every project online — this becomes your portfolio

React (recommended)

The most demanded library for modern front-end jobs

TypeScript

Write safer, larger, more professional code

Build 5–10 Projects

Real apps for your portfolio and confidence

CSS (Gamal)

[youtube.com/playlist?
list=PLknwEmKsW80s7rKViMCL8x6irVJT7McSS](https://youtube.com/playlist?list=PLknwEmKsW80s7rKViMCL8x6irVJT7McSS)

CSS Tasks

elzero.org/study/css-2021-study-plan/

4 Practical Projects

elzero.org/practical-html-css/

Bootstrap (Elzero)

[youtube.com/playlist?list=PLDoPjvoNmBAyvm7f--
dc6XqkpfDcen_vQ](https://youtube.com/playlist?list=PLDoPjvoNmBAyvm7f--dc6XqkpfDcen_vQ)

Tailwind CSS

[youtube.com/playlist?
list=PLxbVBWjVdAEjmn2KbE1886vVkpV1Iu67J](https://youtube.com/playlist?list=PLxbVBWjVdAEjmn2KbE1886vVkpV1Iu67J)

JavaScript (Elzero)

[youtube.com/playlist?
list=PLDoPjvoNmBAx3kiplQR_oeDqLDBUDYwVv](https://youtube.com/playlist?list=PLDoPjvoNmBAx3kiplQR_oeDqLDBUDYwVv)

JS (Gamal)

[youtube.com/playlist?
list=PLknwEmKsW80uTqUDaFRBiAViDZ5uI3VcE](https://youtube.com/playlist?list=PLknwEmKsW80uTqUDaFRBiAViDZ5uI3VcE)

JS Tasks

[elzero.org/study/javascript-bootcamp-2021-study-
plan/](https://elzero.org/study/javascript-bootcamp-2021-study-plan/)

SUCCESS TIPS

Follow the order strictly

HTML → CSS → Projects → Framework → JS

Do every assignment

Elzero tasks are the real training ground

Build more than you watch

After every section, recreate something yourself

One instructor is enough

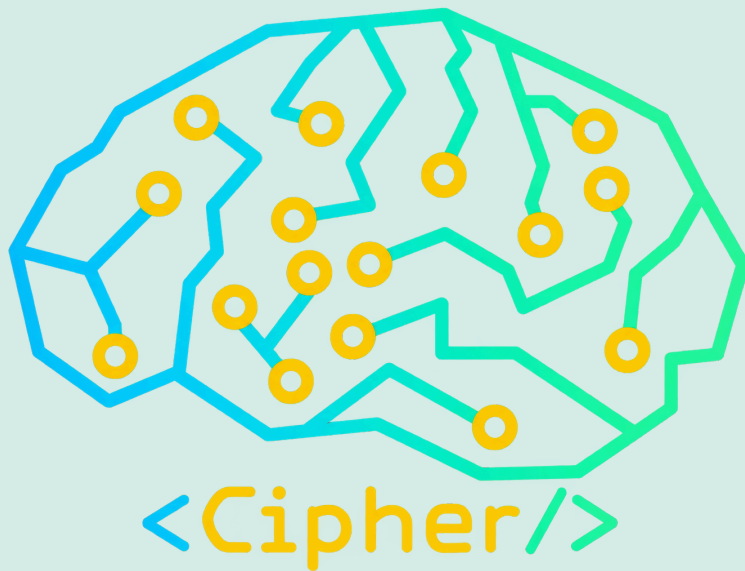

Pick Elzero or Gamal — the one that clicks with you

Push everything to GitHub

Your projects = your future CV

Be consistent

1–2 hours daily > 10 hours once a week
